1) Visibility of System Status
Yes, a message would pop up after the user successfully logged in.
It might be helpful to add a status bar to show the user how many images are left.

2) Match Between the System and the Real World
It is a straightforward system. It won't take the user too much effort to use it.

3) User Control and Freedom
Will the user be able to go back to the previous image or save their current progress and work on it later?

4) Consistency and Standards
Nothing was wrong here. Good job!

5) Error Prevention
Do the users have the opportunity to go back to edit their slogan for previous images?

6) Recognition rather than recall
Nothing was wrong here. Good job!

7) Flexibility and efficiency of use
Does the order of cocktail images matter, or is it randomly assigned?

8) Aesthetics and Minimalist Design
Nothing was wrong here. Good job!

9) Help users recognize and recover from errors
Will an error message pop up when the user doesn't enter any input for a cocktail image, or will any error message remind the user the slogan should only be one line?

10) Help and documentation
Maybe explain why the ChatGPT appears or doesn't appear on the screen. And tell the user how they should use ChatGPT.
